

Skyfol films

Solutions for Business Partners

Is it warm in summer near the windows in spite of the air-conditioner?
Do you spend huge amounts on energy in summer? Do you want windows with a better look in your office?
You don't want people looking into your warehouse?
You can't see the monitors because of glare? Do you want to reduce your heating costs?

One of the greatest but weakest points of the building is the glass that connects the environment and the indoor spaces. Because of the glass we waste huge amounts of energy and we are exposed to danger. SkyFol window films help to solve your problems in connection with the glass.

SOLUTIONS FOR BUSINESS PARTNERS WITH SKYFOL WINDOW FILMS

1. Energy saving

Save a significant part of your costs on air-conditioning with filtering the energy coming through the windows. You can effectively reduce your energy costs with SkyFol ThermoProtect window films, even in a fully invisible way. Make your workplace a more economic place!

2. Splintering resistance

SkyFol Security window films keep the glass unit in one piece in case of glass breakage; in this way they circumvent splintering, the most common reason for injuries caused by glass breakage. Make your workplace safer!

3. Protection against burglary

SkyFol Security window films are suitable for replacing metal bars; the films ensure an equal protection as they drastically slow down the process of breaking the glass through. On shop windows or shop-fronts the films can prevent smash and grab raids and they protect the glass surfaces of offices. It is available in invisible, crystal-clear and metallized, heat protective variants. Make your workplace safer!

4. Light balance

Those who work before monitors or other displays often complain about too much light making monitors reflective and therefore the readability is reduced significantly. You can reduce incoming light with SkyFol window films, securing the necessary circumstances for effective working. Make your workplace more comfortable!

5. Space separation

Separating space in offices with glass raises several questions. It is difficult to adjust it to the changing image and the usage as the installation of the glass is laborious and expensive. SkyFol Decour window films make the inside spaces more harmonic; with their help the image of glasses can be changed any time. Make your office harmonic!

6. Image

We can see several office buildings which - for some reason - do not fit their environment or they seem old fashioned. The installation of SkyFol window films is an ideal solution to enhance the image of glasses. Make your office more modern!

7. Protection against graffiti

On a lot of shop windows or shop-fronts there are graffiti and acid bites which embitter our life. SkyFol Security AG films make up an invisible layer on the glass which take up these kinds of attacks. The film can be removed easily, making it possible to avoid the difficulties and costs of the replacement of glass units. Make your glass-fronts protected!

8. UV protection

The protection of our health is an utmost priority; SkyFol window films filter 99% of harmful UV-B and UV-A radiation that comes through the glass. UV radiation is also responsible for the fading of our valuables in the first place; SkyFol window films prolong their durability. Protect yourself against harmful UV radiation!
