Home Protection With
SkyFol Window Films

Have you ever been disturbed by the heat coming through your window in summer?
The air-conditioner is running all the time and it is still not cool in your home?
You don't want to live in darkness because of roller shutters in front of your windows in summer?
Would you like to have more developed insulating glasses in winter but you don't want to change your glazing?
Has a window ever been broken in your home endangering your or your family's safety?
Do your valuables fade because of harmful UV radiation?
Are you worried about your family because of burglars?
Do you want protection without metal bars in your view?

Skyfol Films

Home Protection With
SkyFol Window Films

SKYFOL WINDOW FILMS HOME PROTECTION

SKYFOL WINDOW FILMS OFFER A SOLUTION FOR ALL OF THE LISTED PROBLEMS!

1. Heat protection

SkyFol ThermoProtect window films effectively protect you from summer heat coming through windows, making your home more comfortable and reducing your energy costs for cooling. What is more, your window won't lose its transparency. The performance of the special SkyFol ThermoProtect series is almost equal with that of soft metal coat. Make your home more comfortable and economic!

2. Shatter resistance

SkyFol Security films keep the glass unit in one piece in case of glass breakage. In this way, they avoid shattering - the main cause of injuries resulting from glass breakage. Make your home safer!

3. Burglary protection

SkyFol Security window films are suitable to replace metal bars; the films ensure an equal protection as they drastically slow down the process of breaking the glass through. It is available in invisible, crystal clear and metallized, heat protective variants. Make your home safer!

4. UV protection

The protection of our family members is an utmost priority. SkyFol window films filter harmful UV-B and UV-A radiation that comes through the window to 99%. The UV radiation is responsible for the fading of our valuables as well, so the SkyFol window films lengthen their durability. Protect your home against harmful UV radiation!

The SkyFol window films represent the highest quality of the American film industry. All signed members of the SkyFol Applicator Network are well qualified professionals. After each job they fill out a numbered Certificate. Look for SkyFol quality in respect of both films and coating jobs.
