UV rejection	99%	99%	99%	99%
Solar energy rejection	42%	40%	38%	29%

SKYFOL SHARK RS THE ECONOMIC SOLUTION

Forwarders often have to face the problem that their cars are cracked because of the goods, machines and other valuable articles that can be seen through the glazing. A simple solution is to prevent people seeing into the cargo hold so that thieves are provoked to a lesser extent and they cannot see what is inside the car; in this way neither the risk, nor the profit of cracking would be measurable. The Shark RS series is an economic solution for dimming the car. Protect your valuables and tools from curious looks.

	HP 03	HP 05	HP 15	HP 20	HP 35	HP 50
Visible light transmittance	3%	7%	17%	27%	33%	51%
Visible light reflection	8%	8%	8%	8%	8%	8%
Infrared rejection	54%	44%	44%	44%	44%	44%
UV rejection	99%	99%	99%	99%	99%	99%
Solar energy rejection	60%	58%	56%	54%	49%	40%

SKYFOL SHARK HP THE CLASSICAL SOLUTION

Classical heat protection films are the most popular among the automotive window films because they provide privacy, protection from heat and modern appearance at the same time. The SkyFol Shark HP series unites the most recent development of a dyed structure with an aluminum metallized layer, ensuring easy installation, strong heat protection and durability.

Shark Automotive Window Films

Perfect Window Film Solutions

- EXTRA HEAT PROTECTION
- PRIVACY PROTECTION
- SPUTTERED STRUCTURE
- ADVANCED UV FILTER
- 10 YEARS WARRANTY

	UP 10	UP 20	UP 35

Infrared rejection	84%	61%	61%
UV rejection	99%	99%	99%
Solar energy rejection	65%	60%	55%

SKYFOL SHARK UP A BRILLIANT SOLUTION

SkyFol Shark UP automotive window films reflect heat well, are slightly reflective and extremely durable for specially heat sensitive customers. The structure contains only a slightly reflective metal, which functions as a perfect heat protection shield against infra radiation; it ensures extra long durability as metal doesn't fade. The Shark UP series has a neutral color, which means, that windows keep their original color.

- INVISIBLE HEAT PROTECTION
- CRYSTAL-CLEAR STRUCTURE
- TECHNOLOGY OF TOMORROW
- ADVANCED UV FILTER
- 5 YEARS WARRANTY

	IR 70
Visible light transmittance	75%
Visible light reflection	8%
Infrared rejection	80%
UV rejection	99%
Solar energy rejection	53%

SKYFOL SHARK IR THE INVISIBILITY SOLUTION

The film industry couldn't offer a solution for those customers, who didn't want to let dark films be installed onto the glass surfaces of their cars but who wanted effective protection against burning heat. Until now. SkyFol proudly presents Shark IR 70, which provides 80% infra protection besides 75% light transmittance! The second generation of the SkyFol Shark IR series is an individually developed product which is only available through the SkyFol Applicator Network.
