

Shark Automotive Films

Perfect Window Film Solutions

- STRONG PROTECTION
- CRYSTAL CLEAR STRUCTURE
- HIGH GLOSS
- EXCELLENT WEATHER- AND UV-PROOFNESS
- CAN BE REMOVED FROM SURFACE WITHOUT ANY LEFTOVERS

SKYFOL SHARK PPF THE INVISIBLE PROTECTION!

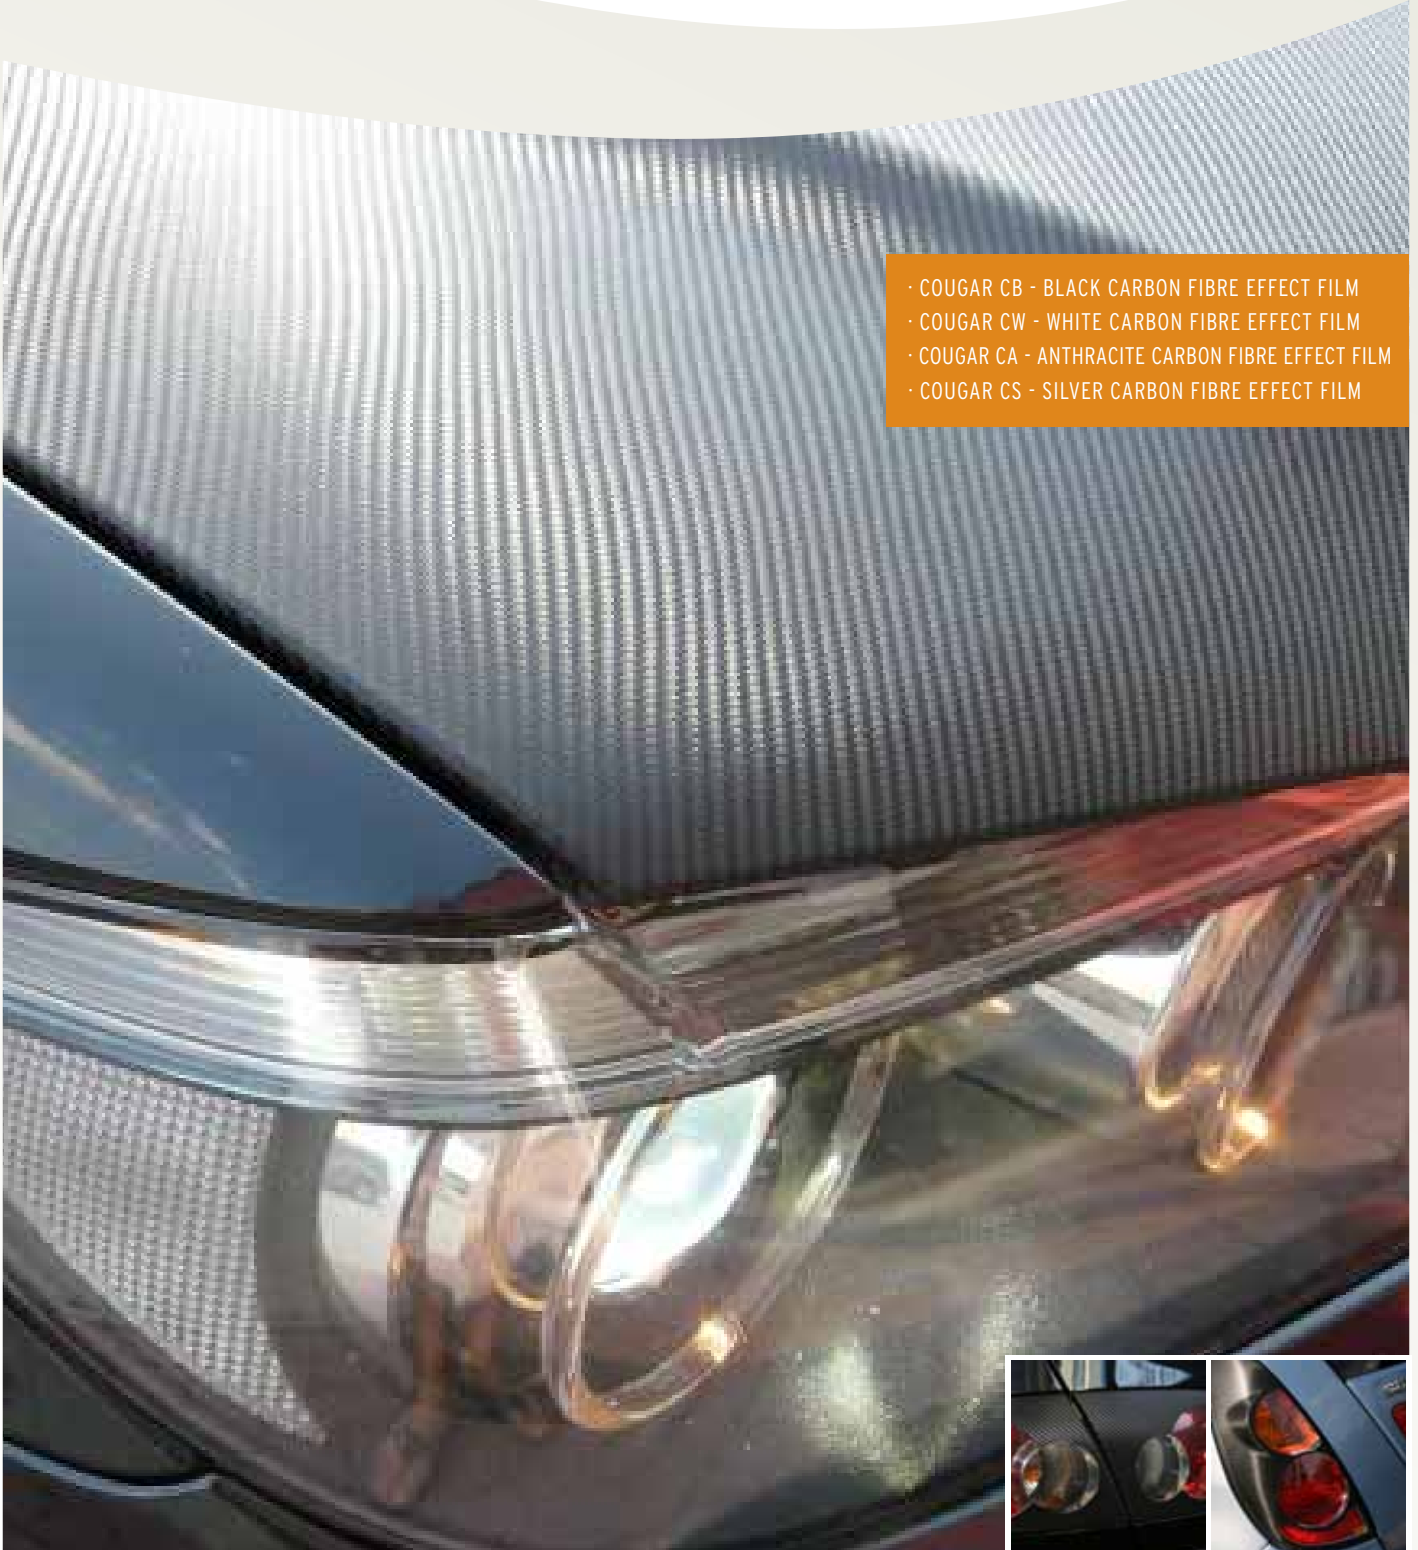

The SkyFol Shark PPF is a polyurethane auto body protection film that can absorb kinetic energy preventing damage of the surfaces. It provides strong protection against pebble stones, scratching boughs, intentional scratching and bug pollution. Thanks to its flexible structure, whole units can be coated with one piece of film without cutting the material. **The SkyFol Shark PPF is a much better solution than putting artificial leather onto the first stripe of the front bumper. It is more aesthetical, there is no scratching because of stuck dirt, it is more durable and even the whole auto body can be coated.**

Cougar Automotive Films

Optical Tuning Solutions

- COUGAR CB - BLACK CARBON FIBRE EFFECT FILM
- COUGAR CW - WHITE CARBON FIBRE EFFECT FILM
- COUGAR CA - ANTHRACITE CARBON FIBRE EFFECT FILM
- COUGAR CS - SILVER CARBON FIBRE EFFECT FILM

SKYFOL COUGAR CARBON INDIVIDUAL LOOK!

SkyFol Cougar Carbon films are perfectly suitable for coating the whole vehicle because of their cast structure. There is no worry even after several years that the film could peel off the curves. Because of the structured liner, the film can be applied perfectly well and easily. The liner digs air-channels into the adhesive, making the extrusion of air easier. The Cougar Carbon series is available in four colors.
