

SKYFOL® PPF WRAP

*Professional coloured
paint protection films*

Skyfol®
Film Solutions

BENEFITS OF SKYFOL PPF WRAP

The monopoly of transparent paint protection films is a thing of the past - colorful, patterned paint protection films are becoming more and more widespread on the market. Perfect protection and stylish appearance are ensured at the same time, no more compromises are needed.

In the past, if we wanted to change the color of our car, only PVC-based, "orange peel" films were available from the selection of car wrapping films. Skyfol PPF Wrap materials are all glass-effect, mirror-shiny materials, in addition they provide professional protection to the paintwork against scratches and stone chips.

PROTECTION WITH UNPARALLELED ELEGANCE

Skyfol PPF Wrap not only protects the vehicle against damages but also **provides a perfect glossy colour with a stunning appearance** that turns heads wherever you drive the car.

SELF-HEALING FEATURE

Like all Skyfol PPF series, PPF Wrap is self-healing, so **micro-scratches disappear from its surface by heat.**

Anyone who has ever seen a scratched polished surface when the sun shines on it knows how important this property is. The special structure of the surface coating allows the film to return to its original state. It is important, however, that more serious mechanical influences already penetrate this surface coating and do not disappear, but the wear and tear that occurs during everyday use and cleaning does not appear on the surface of the film.

WATER REPELLENCY

Thanks to the water repellency of the surface, the Skyfol PPF Wrap paint protection film has similar cleanability attributes to ceramic coatings. At the same time, it **provides protection from mechanical impacts and makes your car easier to clean.** It's no coincidence that you want to give your car a new look with the best existing film solution and adequate protection.

AVAILABLE DIRECTLY FROM STOCK

A wide range of colours are available right away from stock. No need to give up your most precious colour just because it's not kept on stock! Got a damaged car with coloured PPF that needs fixing? **Say goodbye to waiting for weeks and months** to match the exact colour!

It will be easy to replace with the in-stock films, accessible through your exclusive local Skyfol distributor! No need to buy a full roll, simply request the length in cut linear meters that suits your needs

MORE DURABLE THAN PVC CAR WRAP FILMS

Skyfol PPF Wrap coloured paint protection films provide a durable solution for changing the colour of the car: thanks to the **polyurethane raw material**, which are **much more durable than general PVC car wrapping films.**

With the help of appropriate car care, the paint protection film will remain in perfect condition for a long time, in addition to the original paintwork underneath also has maximum protection. If you would like to have the coloured PPF removed from the car after years, you can get the original paintwork back!

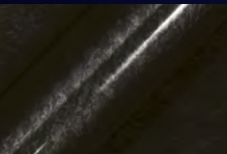

THE RANGE OF **SKYFOL PPF WRAP SERIES** IS
CONSTANTLY EXPANDING, YOU CAN CURRENTLY
CHOOSE FROM **COUNTLESS VIBRANT COLORS**.

Three distinct types crafted through advanced manufacturing techniques: cast, extruded, and air-channeled. Discover the unparalleled benefits offered by each innovative technology!

DISCOVER THE FUTURE of CAR WRAPPING

Why would you go with installing classic PVC car wrapping films, when you can continue your profession at a higher level? Offer your customers more than other workshops by installing PPF combined with stylish colours! Level up your business and start working with coloured paint protection films today!

Orange-peel effect
Weaker surface gloss
Colour difference & fading as
time goes by
Shorter durability & lifetime

Excellent smooth surface
Extra shiny surface gloss
No colour difference as
years pass
Longer durability
& lifetime

Car Wrapping Films vs. Coloured PPF

Easy to delaminate during stretching
Not comparable to original factory paintwork
Plastic-like effect
No efficient protection for the car body
No self-healing feature

No delamination during stretching
Comparable to original paintwork
Glass-like effect
Efficient protection against damage
Perfect self-healing feature

The future of car wrapping films is your future

PIONEER IN THE PAINT PROTECTION FILM INDUSTRY

Skyfol was among the very first companies bringing PPF technology to Europe. During the past 20 years, Skyfol has been an innovator in the PPF industry, introducing one of the first clear-coated films in 2010, the first hydrophobic film in 2016 and the first flexible no-stain coating in 2022. Skyfol always seeks better solutions. Working with a sole distributor per country, Skyfol today has distributors in 30+ countries and offers a professional service with a wide range of products that are hard to match in the industry. Be a part of this successful story and team up with Skyfol paint protection films!
