HP Max

IS IT WARM ON THE BACK SEAT?
WOULD YOU LIKE TO HAVE YOUR FAMILY IN SAFETY?

You park your car, which gets hot in a few hours, and all the parts inside radiate the heat. The child safety seat is 60 degrees and even if you start air conditioning your car, it will not get cooler in 10 minutes. If you put your children in the child's seat, they will imme-

diately get soaked in sweat, so you cannot turn on the air conditioning. Also, unbearable heat continues to radiate through the glass. The ideal solution is a heat protection window film: Skyfol HP Max will filter heat already at the window.

Up to 53% heat protection

Filter the heat right at the window. The fine metallic layer in the HP Pro and HP series filters infrared radiation, therefore is **protects against scorching heat**. The film **increases your travelling** comfort by light filtering, as well as by heat protection.

Aesthetic appearance

A flitting piece of cloth? Horrible sunshades? Window films are **aesthetic products** you can always trust, while they also provide **perfect visibility** so that your driving does not get more risky.

HP Max

99% UV filtering

Thanks to the professional UV filtering layer built into the structure of the Skyfol HP Max series, **we provide one of the highest values in the film industry, which will be durable for long years.**

Up to 96% light filtering

Your child cannot sleep peacefully because of too much light, while older children cannot see the screen of gadgets. The SkyFol HP Max series provides excellent **protection against too much glare.**

Technical details

Technical details	HP Max 05	HP Max 15	HP Max 35
